

# Hello, my name is Tevin.

# I'm a product designer that links the values of a company to the experience of a user.

## I am..

A designer living in Almere, a town near Amsterdam. For the last 12 years I've been a student of design, literally and figuratively. I work with passion and love to keep on learning. The more I learn about design and the possibilities the more passionate I become.

## I can..

- Code // HTML, CSS, SCSS, JS
- Design // Sketch, Adobe, Figma
- Concept creation & ideation - Test // Invision, Zeplin, Marvel, Figma
- Project & Time management // Notion, Linear
- Data management // Mixpanel, Adjust, Hotjar
- Research // Maze, Usertesting, Dovetail

## Education..

2011 - 2015

Media-college Amsterdam  
Media designer (Interactive)

2015 - 2020

University of applied sciences (HvA)  
Communication and Multimedia Design  
Major: Interaction design Minor: Entrepreneurship

## Projects..

PostNL (2017 — 4,5 months)

// Project - Interaction Design

I've helped PostNL with creating a user-friendly interface for their Parcel and Mail Vending machine. The goal was to focus on all kinds of stakeholders (users, delivery men, PostNL itself), to create an interface that was easy to use.

Amsterdam Fashion Institute (2018 - 2019 — 4 months)

// Project - Experience Design

I've worked together with the AMFI fashion group iNDiViDUALS to create an experience for visitors of their exposition. In this experience visitors would step in the shoes of a fashion manager and would navigate the choices and problems that fashion managers experience while working a project.

Netherlands Cancer Institute (2020 — 4,5 months)

// Project - Interaction Design

I've helped the Netherlands Cancer Institute with visualising the digital images, that their Surgical Navigation System uses to navigate the human body. This system will be used during surgery to help the surgeon perform with a higher accuracy and enhance what they see during a surgery.

## Employment..

bunq (2020 - 2021)

// Full-time - Product Designer

bunq is a dutch neo-bank that focuses on giving users control and a green option to banking. During my time there I mainly worked on the activation of users, next to that I worked on multiple projects from partnerships to new products.

Informaat (2021)

// Part-time - UX Designer

While at Informaat I've worked for big clients (ING) to smaller clients (Methaplanet), within those projects I've moved between UX/UI to help with getting things in order.

Secfi (2021 - 2022)

// Part-time - Product Designer

At Secfi I've worked on several projects, the most important one was called the portfolio tracker — within this I had to visualise different sets of data that helped to represent a person's net worth.

Within this I needed to focus on how to get people to easily add in their debt/assets and how to indicate the link between Secfi and the data broker Plaid.

Next to that project I've helped with the rebranding, email design and social posts.

Fonk (2023)

// Part-time - Product Designer

At Fonk I've worked for several different clients to help them with getting their UX in order. During this time I'd switch between working on the interaction and working on the visual style of projects.

Freelancing (2018 - Current)

// Freelance Creative

Next to my usual work I use my creativity and skills to help people with their challenges. From websites, UX/App design, 3D visualisations. To design thinking, brainstorm sessions and concept creation.

Fana (2023 - Current)

// Contract - Senior Product Designer

Through Introed I came into contact with Fana, they needed a refresh of their current wallet with the launch of their new card.

Primer (2023 - Current)

// Contract - Senior Product Designer

As a Senior Product Designer at Primer I help with building new features and enhancing old ones. I work in the Automations team.
