

Hello, my name is **Tevin Stuurland**, I am an interaction designer that likes to create new, refreshing solutions to complex problems.

I AM..

A 26 year old designer living in Almere, a town near Amsterdam. For the last 9 years I've been a student of design, literally and figuratively.

I'm a person who works with passion and curiosity. While I was learning more about digital design I have gotten the chance to navigate different kind of paths (UX, Interaction, Visual, Emerging technologies. And with every step my passion for design has grown.

Ever since then I've only grown to love it more, every day I try to learn more about design, coding and implementation.

I CAN..

- Code // HTML, CSS, SCSS, JS
- Design // Sketch, Adobe, Figma
- Concept creation & ideation
- Test // Invision, Maze, Zeplin, Marvel
- Project & Time management // Notion, Trello, Monday, Asana
- Data management // Mixpanel, Adjust
- 3D visualisations // Blender, C4D

See LinkedIn for more information

EMPLOYMENT..

2016 - 2018 (2 years)

Troop Design

// **Entrepreneurship**

Co-founder, Designer, Developer

2020 - Current Employer

bunq

// **Full time** - Junior Product Designer

I help with constructing, maintaining and enhancing the onboarding within the bunq app. Next to that I focus on the activation of users and how to get them in.

EDUCATION..

2011 - 2015

Media-college Amsterdam

Media designer (Interactive)

2015 - 2020

University of applied sciences (HvA)

Communication and Multimedia Design

Major: Interaction design

Minor: Entrepreneurship

See LinkedIn for more information

INTERNSHIPS..

2017 (4,5 months)

PostNL

// **Project** - Interaction Design

I've helped PostNL with creating a user-friendly interface for their Parcel and Mail Vending machine. The goal was to focus on all kinds of stakeholders (users, delivery men, PostNL itself), to create an interface that was easy to use.

2018 - 2019 (4 months)

Amsterdam Fashion Institute

// **Project** - Experience Design

I've worked together with the AMFI fashion group iNDiViDUALS to create an experience for visitors of their exposition. In this experience visitors would step in the shoes of a fashion manager and would navigate the choices and problems that fashion managers experience while working a project.

2020 (4,5 months)

Netherlands Cancer Institute

// **Project** - Interaction Design

I've helped the Netherlands Cancer Institute with visualising the digital images, that their Surgical Navigation System uses to navigate the human body. This system will be used during surgery to help the surgeon perform with a higher accuracy and enhance what they see during a surgery.
