

Hello, my name is **Tevin Stuurland**, I am an interaction designer that likes to create new, refreshing solutions to complex problems.

## I AM..

A 25 year old designer living in Almere, a town near Amsterdam. For the last 9 years I've been a student of design, literally and figuratively.

While design wasn't my passion or main job at first, I always had an interest in it and was always pulled towards certain aesthetics. When I started college 9 years ago, I really started to see what design means and what it entails.

Ever since then I've only grown to love it more, every day I try to learn more about design, coding and implementation.

## I CAN..

- Code // HTML, CSS, SCSS, JS
- Design // Sketch, Adobe
- Concept creation & ideation
- Test // Invision, Maze, Zeplin, Marvel
- Project management // Notion, Trello, Monday
- Data management // Mixpanel
- 3D visualisations // Blender, C4D

See LinkedIn for more information
